5th & 6th grade students used umbrellas to celebrate a temporary art Christo. The students created different geometric designs on the field using multi-colored umbrellas. Students prepared for the project for four weeks. The project was used to give students a sense of the work and planning involved in a major art work.

For the first time, Valley was represented by a team at the district level in an international problem-solving competition called "Odyssey Of The Mind." The students designed 5 vehicles and attempted to fulfill the task requirements. Points were awarded for the designs, the degree of task completion, as well as creativity of presentation. Our team finished fifth out of the nine teams competing. An excellent effort for the first time out!
