A nice cool day. The wind was the west wind that in day is sent from the old machine and fixed the wheel.

Pa. sent some grain all before coming. A few more sent to the mill. The mill and the Perry went down to the ship and Gen. J. D. went at the wheat. I got up the stack and went out after a

load. Got the load off the hill and began to finish it up at the top of the hill. After the last wheel was on we ran over a rock and got stuck. I pumped the pump and shifted and still could not get it out. I tried to get it out by putting a board in place but we managed to turn the wagon back and reload again. I am laced up now.
